PENINSULA TRIPS FOR FAIR VISITORS

BEAUTIFUL RESIDENCES AND SCENERY OF COUNTRY WILL BE SHOWN TO VISITORS.

Exposition Commission Makes Contract With Taxi Company to Supply Sight-Seeing Autos.

The great scheme to advertise San Mateo county during the Exposition will soon be under way. Thursday the County Exposition Commissioners entered into contract with the California Taxicab Company to furnish automobiles for sightseeing trips down the peninsula, with the understanding that the contract will not be signed until the taxicab company furnish an indemnity bond in the sum of $25,000 to relieve the County of San Mateo of all responsibility in case of accident.

This will be San Mateo county's exhibit at the Exposition. It is something decidedly original. San Mateo county is a community of beautiful homes and scenery. No picture would do justice to these striking features of the county. In order to show our attractions to the thousands who will come to San Francisco, the Commissioners have decided to bring the people to the county and let them see us as we really are.

Simultaneously with the tentative acceptance of the proposition submitted by the Taxicab Company, the County Commissioners appointed Claude M. Hirschey of Hillsborough as their traffic manager. Mr. Hirschey, who is a deputy marshal of Hillsborough, has been granted a leave of absence for ten months by the Hillsborough city trustees in order that he may devote his entire time to his duties for the Exposition Commission.

The contract which will be entered into with the Taxicab Company of California follows a thorough investigation by the commissioners of many different schemes for showing San Mateo county's scenic, climatic and commercial advantages to the best class of Exposition visitors.

Early in its investigation, the commission concluded that free "rubber-neck" rides given out indiscriminately would not attract the maximum number of home seekers and prospective purchasers of land. Several propositions were submitted and subsequently rejected. Finally, Mr. Hirschey, who formerly was engaged in the omnibus business in San Francisco, laid a definite plan before the commissioners and they were so pleased with his proposition that he was told to go ahead and see what kind of arrangements he could make with some automobile concern. Hirschey interviewed the officials of the Taxicab Company of California and obtained a definite proposition from them, which was sumbitted to the commission and accepted, subject to the condition before stated.

The taxicab company agrees to hold six seven-passenger touring cars with competent chauffeurs at the disposal of the San Mateo county commission every day during the Exposition period or as long as the commission desires to continue the contract. The taxicab company will make a charge of $20 for each car per day for a five-hour ride down the peninsula and each passenger will be charged $2. The cars will not be sent out with less than six passengers, who will pay $12 toward the cost of the trip The remaininng $8 for each trip will be paid by the county commission.

A trip down the coast will also be furnished. The ocean trip of 6½ hours will cost the sum of $26, each passenger paying $3 and the commission its $8.

The duties of Traffic Manager Hirschey will be to recruit the passengers from the large San Francisco hotels and from the Exposition grounds. The Taxicab Company of California has the exclusive contract to handle all passenger service for the Palace, St. Francis and Fairmont hotels and for the Inside Inn on the Exposition grounds, which will no doubt be of value in the work of recruiting passengers for the San Mateo sightseeing trips.

Manager Hirschey has stated that he anticipated not the slightest difficulty in filling all of the six cars every day.

If the six automobiles are filled every day for 230 days, or almost eight months, the county commission will make a total expenditure of $11,040 for automobile hire. The capacity of the cars will be thirty-six passengers a day. Therefore in 230 days, 8280 visitors would be shown through San Mateo county. The cost to the commission for every visitor shown through the county will be $1.33.

The commission believes this plan is highly advantageous and that it will result in bringing the best class of bona-fide homeseekers for the minimum expenditure.

Court Madrone, No. 158, Foresters of America, has planned a wonderful day's outing for June 6. Luna Park at San Jose has been secured for the picnic and the contract signed with the park people includes all the attractions.

MONDAY "PACIFIC SERVICE" DAY AT EXPOSITION.

The Pacific Gas and Electric Company, which is supplying the Panama-Pacific Exposition with all its gas and electricity for lighting, heating, the operation of machinery and every other purpose, is to have a day at the Fair all to itself. The day is Monday next and is to be known as "Pacific Service Day."

So far as possible the day will be observed by the company generally as a holiday. District managers will be called in from the interior and all employees who can be spared, together with the members of their families, will join in the celebration. The proceedings will start at 10 o'clock in the morning at the Fillmore street entrance, where the party will be met by a military escort and band and under care of Exposition guards will be escorted to Festival Hall where a program of exercises has been arranged. A feature of the occasion will be the presentation to the company by President Charles C. Moore of the Exposition Company of a bronze tablet in recognition of the work done by the Pacific Gas and Electric Company in so perfecting its service that the illumination of the exhibit palaces and courts in the Exposition grounds is shown to the best advantage, while the thousand and one pieces of machinery scattered throughout the palaces and elsewhere receive an uninterrupted supply of "juice" for their constant operation.

E. C. Jones, chief engineer of the company's gas department, has been appointed grand marshal of the parade and generalissimo of the "Pacific Service" forces for day. John A. Britton, vice-president and general manager, will take part in the program of exercises in Festival Hall, giving an address upon gas and hydro-electric development. The great organ in Festival Hall will be heard on this occasion with Wallace A. Sabin at the keyboard.

"Pacific Service" expects a royal turnout. Every department of the company has played its part in the preparatory work for the Exposition and the employees are ready to make a gala day of it.

INSURANCE CO. CHARGED BY S. F. GRAND JURY

A sensation was caused yesterday by the publication of a story in the morning papers to the effect that the West Coast Life Insurance Company of San Francisco had been charged before the Grand Jury with conducting business while not in a solvent condition. The charge was made by John E. Phelps, State Insurance Commissioner, and the San Francisco District Attorney.

Recently the West Coast Insurance and the San Francisco Life Insurance Company were merged by a vote of the stock holders, but the coalition was stopped by the opposition of some of the stockholders.

L. F. Behrens, one of the heavy investors and a director of the West Coast Company says that the company's troubles are due to the opposition to merging and that the company is perfectly solvent.

Both companys are largely represented in this city both by investors and policy holders.

CARLOAD OF FORDS AT TANNING COMPANY.

George Kreiss, the agent in this city, received an entire carload of Ford cars last week, which he immediately turned over to the S. H. Frank Tanning Co. The company had the cars shipped to Oakland where they will be remodeled and fitted up with new bodies, to be used as delivery wagons by the Thomas Dyeing Company, in which the tannery people are interested.

Marcus' Department Store is offering special bargains in white goods.

VIOLET DAY AT THE FAIR MADE COUNTY FAMOUS

San Mateo county is getting heaps of publicity throughout the length and breadth of the land. One publicity expert declares that this county is the best advertised in the West, and this statement hits the nail on the head. The International News Service, which is so ably represented in this county, distributes news to more than three hundred live dailies. On Friday morning of last week there appeared in every one of these newspapers an invaluable article about San Mateo County Day and its violet shower at the grounds of the Panama-Pacific International Exposition.

This is how the article started off:

"Literally a ton of violets, with the dew still on them, were given away by San Mateo county at its celebration in honor of the dedication of the county's exhibit at the Exposition. It was San Mateo Day in the California building, and everybody on the grounds knew it, for everybody wore a bunch of violets."

The shower of violets may or may not appeal to every San Matean as these flowers are plentiful in our midst, but suppose you lived in a land where the sun rarely shines in the winter months and you read of a place where the beautiful violet flourishes in its glory practically the year around, wouldn't you think twice about such a community when you probably havn't seen a violet for months?

San Mateo county is getting publicity in the places remote and where real results are to be obtained.

The violet shower of San Mateo County Day strikes a high note in international publicity and can only be ranked with and is the peer of San Francisco's famous Christmas eve open-air song festival.

San Mateo county is taking the ranking position in the production of violets. One of the largest violet farms in the world is conducted in the north-end of the county by Joseph Lagamarsino. His ranch consists of thirty acres and yields an average of 2,000 bunches of violets daily during a season of six months. The energetic grower has met with remarkable success in transporting violets as far north as Vancouver, as far south as San Antonio, Texas, and as far east as Chicago. He has produced a type of violets which are extremely hardy as well as beautiful, and the keeping properties of his flowers has enabled him to ship them anywhere with good results.

Lagamarsino's success is but typical of the violet industry as it exists in San Mateo county. While the soil of the southerly end of the peninsula and the coastside has earned an enviable record for producing other flowers, it remained for northern San Mateo county to suddenly spring forth as the center of violet industry.

CONGREGATIONAL MEN WILL DINE AND HEAR ADDRESS

The men of the Congregational church are arranging another "Men's meeting and supper" to be held at the church parlors next Tuesday evening. Dr. John H. Williams of Redlands, temporarily residing in Palo Alto, has been secured to deliver the address. Those who have heard Mr. Williams talk say that his audience next Tuesday evening will be given a treat.

The meeting is not confined to the male members of the church. All gentlemen of this city will be welcomed.

The Ladies Aid Society will serve the supper for which a nominal charge of 25 cents will be made. Those who expect to attend are requested to send their names to C. M. Doxsee on or before next Saturday so that the ladies may know how many plates to provide.

Mrs. Fred Morley of San Francisco will pass the month with her parents, Mr. and Mrs. J. J. Read.

CITY OFFICIAL PAPER

D. E. O'KEEFE, Editor and Proprietor

A NEED EMPHASIZED.

The complete destruction of the beautiful Whitney residence Thursday morning again emphasizes the serious need of a radical improvement in the fire fighting conditions existing in this city. Not that the personnel of the fire department is lacking in efficiency or devotion to duty, nor that its officers are not in every sense capable and fitted by experience for the duties which devolve upon them.

The local fire department, for a purely volunteer organization, is composed of excellent material. On its rolls will be found many of the best young men of the city, all active and by nature well fitted for the arduous tasks which they are at times liable to be called upon to perform, while those to whom has been delegated the direction of the department are men who have made this class of work a study and are qualified to command.

If, however, the efforts of these men are to be made of real value, they must be provided with appliance fitted for the work which they are called upon to do. No matter how prompt they may be in responding to the call to duty, no matter how well their efforts may be directed, unless the equipment provided for the work is ample and of efficient character, they can accomplish but little.

That the equipment now in use is totally unfit for the work which it is intended to do has been amply demonstrated upon numerous occasions. While the apperatus, what there is of it, is in as good condition as could be expected, it must be admitted by those at all familiar with the subject to be both deficient in quantity and antiquated in construction.

In the case of a fire, be it of small or great magnitude, the first essential must always be prompt response. This with apparatus entirely hand propelled, as is the case with this city, is obviously out of question. No manter how prompt the men may be in responding to an alarm, it is obvious that much valuable time must be lost in reaching the scene of the fire, especially if this be in the residental districts, where experience teaches these fires most frequently occur.

Certainly it is not good business policy to place the risk of valuable property at the mercy of inefficient apparatus. Nor is it just to the members of the fire department to ask that they should perform a gratuitous service under serious handicap. Many of the men who compose our fire department are actuated purely by a spirit of devotion, having no personal property interests to protect. Without hope of reward, other than that of the commendation of duty well done, these men devote their time and take personal risks in the interest of the public. For its own protection, as well as an evidence of appreciation of this unselfish devotion, the city can well afford to provide apparatus of modern construction and suited to the character of the work to be done.

NEW MANAGING EDITOR.

James D. Hedge has been engaged by J. V. Swift to succeed him in the management of the Democrat when he gives up his editorial duties to take charge of the local post office. Mr. Hedge has for the past seven years been in charge of the men's furnishing department of Ganter & Mattern in San Francisco. He is a graduate of Sequoia Union High School with the class of 1899. After graduating from high school he went to Nevada, where he engaged in business until 1907, when he returned to California. Mr. Hedge was born and raised here and so is acquainted with conditions. He has traveled sufficiently to broaden his mind and he will take up his new duties fresh from a successful business career. We bespeak for Mr. Hedge a most successful career in the newspaper work. Mr. Swift could not have secured a successor who will lookout for his interests better, as Mr. Hedge is honest and energetic in every sense of the word. He will bring his family to Redwood City next week. We congratulate Mr. Hedge and wish him success and God speed in his new work.

IS TRUSTEE RESPONSIBLE FOR RETULT OF INVESTMENT

The civil suit of Lester Blanchard against Catherine Kelly, as administratrix of the estate of Thomas J. Kelly, deceased, that was begun in the Superior Court in 1910 was tried beefore Judge Buck on Thursday and submitted to the court for its decision. Early in the nineties Mr. Blanchard's grandmother Mrs. Margaret Kelly, died at her home in Portola. She was the wife of Hugh Kelly, whose estate she inherited. By the terms of her will she bequeathed the sum of $1000 to her grand child. Her son, Thomas Kelly, was to hold the money in trust for the minor until he became of age. By the terms of the trust Mr. Kelly was to invest the money in mortgage securities. Awaiting a profitable mortgage investment he deposited the funds in the California Safe Deposit and Trust Company of San Francisco Co. in 1905. Two years afterwards the bank failed and Kelly lost the money. Young Blanchard contends that the trustee violated the terms of the trust when he did not invest the money in mortgage securities and his estate therefore is responsible for the money. Besides the $1000 plaintiff asks for interest at the rate of seven per cent per annum from 1905. The defense makes the point that the money was only temporarily deposited, awaiting a profitable investment. On the other hand the plaintiff contends that the funds were deposited in the saving bank of the institution and remained there for two years, or until the bank closed its doors. The case was an interesting one, involving many technical legal points. Archer Kincaid of this city appeared for Mrs. Kelly, whose husband died three years ago, and Fred L. Button of Oakland is the attorney for young Blanchard. A portion of the well-known Kelly ranch at Portola was purchased some years ago by the Family Club and it has erected several club houses and it is there that the members make merry every Saturday and Sunday 'neath the towering trees.

EDUCATIONAL SUBJECTS SHOWN AT EXPOSITION

From Marina to main gate and from Inside Inn to the Van Ness avenue entrance, the builders of the Panama-Pacific Exposition have made educational value their prime consideration. In architecture, design and treatment, in exhibits and gardening and even in the concessions that have been permitted to go on the amusement "Zone," educational value has been the first test of worth.

So far have they gone with this idea that they sent to Europe for E. W. McConnell, an economist of note who came to international fame when he conceived the idea of educating the masses in both biblical and modern history, not by books and records, but by pictures, spectacles made to show the wonderful incidents of history in their correct chronological sequence. It is the theory of Mr. McConnell that, if the picture of the incidents sought to be conveyed is made beautiful enough, it will remain longer and more clearly in the memory than all of the rhetorical beauties that might be evolved.

To demonstrate the McConnell theory and at the same time provide the Exposition with three magnificent spectacles, $700,000 has been expended upon the construction of three huge palaces on the "Zone" in which are housed the three greatest of the many educational "spectacles" Mr. McConnell has produced, namely: "Creation," the "Evolution of the Dreadnaught" and "The Battle of Gettysburg."

Creation has been declared by European critics one of the world's most beautiful scenic spectacles, yet it is nothing more or less than the first chapter of the Book of Genesis. It is a picture of the coming of the world out of chaos and the birth of man, Adam and Eve being shown in the midst of the delights of the Gorden of Eden.

The "Evolution of the Dreadnaught" shows, by a series of actual battles fought out with the real implements of warfare, the development of thee world navies of today from the original war galley of prehistoric times.

"The Battle of Gettysburg" is an absolutely accurate pictorial reproduction of the crucial battle of the Civil War. Both Confederate and Union veterans who fought in the famous battles, are at hand to lecture upon its various phases.

HANDSOME RESIDENCE DESTROYED BY FIRE

Last Thursday morning at 11 o'clock the beautiful and attractive home of E. M. Whitney in Wellesley Park was destroyed by fire. The fire department was prompt in answering the alarm turned in when the flames began to make headway, but before the fire boys could get in position with their hose the flames had enveloped the building so the department turned its attent to the adjoining structure, owned by Mrs. Chase and by concentrating its hose on that building, were able to save it. The fire started in the den of Mr. Whitney, supposedly from a fire in an open hearth. Mr. Whitney and a Japanese servant were out in the garden at the time and did not notice the fire. It was first observed by neighbors who gave the alarm. The loss will be about $18,000. A greater portion of this was covered by insurance. The structure was one of the first erected in Wellesley Park. It was built by R. C. Hurlbut shortly after the mid-winter fair in San Francisco and was built from lumber secured from the exposition at that time. Mr. Hurlbut erected many buildings at the fair and at its conclusion purchased several of the big structures, tearing them down and bringing the lumber to Redwood City to build his home. It was here that Edward Hurlbut, the novelist and story writer spent his boyhood. In years gone by Mr. Hurlbut entertained his San Francisco friends lavishly and the place was often the scene of merriment. E. M. C. Whitney is the owner and publisher of the "Architect and Engineer of California," a magazine devoted to the building and construction science, with offices in the Monadnock building, San Francisco. Mr. Whitney has been confined to his home through illness for many months and Mrs. Whitney has made daily trips to San Francisco in te interest of the publication.

COUNCIL BALKS AT INSURANCE COSTS

Trustees Regard State Industrial Law as Unduly Expensive Municipal Luxury

Although the adjourned meeting of the city council Tuesday evening was held for the express purpose of completing preliminary action for the ordering of the construction of curbs and sidewalks on the County Road, the entire matter is still in abeyance, no progress having been made. When the meetting was called to order at the scheduled time, a full board of trustees were presnt, though there was a notable absence of spectators in the lobby, considering the importance of the matter under consideration.

An ordinance was presented by City Attorney Mansfield which it is expected will put an end to the vandalism of the blossom hunter. Under the provisions of the proposed law it will be a misdemeanor to mutilate or remove any tree or shrub growing upon the public highways of the city without first having obtained permission from the Superintendent of Streets. The ordinance was given its introductory reading and will probably come up for final passage at the regular meeting next Monday evening.

City Atttorney Mansfield presented a report of the prbobable cost of the insurance of city officers and employees under the industrial insurance law, which indicated that the expense of the city would amount to no mean sum. Under the estimate of the City Attorney, which went into details of the several departments, the minimum cost to the city will be $478 per year. While the trustees considered the investment as hardly justified in the light of experience from accidents in the past, it was pointed out that insurance by the city was mandatory under the law and it was mandaory under the law and it was directed that the required application be made to the State Industrial Commission.

The bond of A. J. Andrews as a master plumber was presented and approved.

Trustee Tuchsen reported that he had succeeded in securing from C. A. Hooper & Co. concessions which would permit of the widening of Vera avneue from the County Road to Davis street to its full width of 70 feet. Under the agreement presented, Hooper & Co., owners of the abutting property will donate to the city a strip 29 feet in width along the north side of Vera avenue, in consideration of which it is stipulated that a portion of Monroe street is to be closed and the vacated lands are to revert to Hooper & Co. As this concession enables the accomplishment of an object which has been seriously sought for the past three years, the announcement of Trustee Tuchsen was received with evidences of pleasure by the trustees and Chairman Merrill and Clerk Plump were authorized to sign the agreement on the part of the city. Trustee Tuchsen informed the council that in agreeing to the vacation of the strip on Vera avenue it had been the expressed wish of the owners of the property that they should be assured that they should not be required to bear any furhter expense for the improvement of that street for at least a reasonable time. This met with the approval of the trustees and while no action in this directon was placed on record, it was tacitly agreed that no street work should be ordered before 1916.

City Engineer Sears and City Attorney Mansfield reported that the plans and specifications for the construction of curbs and sidewalks on the County Road had been completed and that the necessary resolutions preliminary to ordering the work had been prepared and were ready for action. Preliminary discussion developed the fact that a number of minor questions of property interests had been presented during the week which might involve some changes in the scope of the work to be ordered under the legal proceedings and which might require several days for adjustment. With a view to a settlement of these questions in advance of final action, consideration of the plans and resolutions was deferred until the date of the regular meeting of the council next Monday evening.

At the suggestion of Trustee Hahir, Street Superintendent J. C. Dickey was directed to prepare a report showing the locations of sidewalks and curbs which were in need of repairs or reconstruction. It was also decided that in the near future steps should be taken to order the permanent repair or reconstruction of a number of streets which had been worn by years of travel. This in many cases will involve the complete resurfacing of the streets with some modern substance, probably oil macadam finish.

Trustee Tuchsen, chairman of the street committee, was requested to prepare for the council a plan for the adequate drainage of the storm waters on Broadway from Main street to the bridge.
